Ruizhe Shi

srz21@mails.tsinghua.edu.cn srzer

Education

University of Washington, Seattle, USA **Feb. 2024 – Present**
Research Visitor at Paul G. Allen School of Computer Science

Tsinghua University, Beijing, China **Sept. 2021 – Present**
*Undergraduate at Special Pilot Class in Computer Science (**Yao class**)*

- Major: *Computer Science and Technology* *GPA 3.93/4.00*
- Minor: *Chinese Language and Literature* *GPA 4.00/4.00*

Publications

(∗ *indicates equal contribution.*)
[3] Chenhao Lu, Ruizhe Shi*, Yuyao Liu*, Kaizhe Hu, Simon S. Du, Huazhe Xu.
Rethinking Transformers in Solving POMDPs.
International Conference on Machine Learning, 2024.

H-InDex: Visual Reinforcement Learning with Hand-Informed Representations for Dexterous Manipulation.
Annual Conference on Neural Information Processing Systems, 2023.

Research Experience

DPO Theory **May 2024 – Present**
Supervised by Prof. Simon S. Du *CSE, University of Washington*

Multi-objective Language Model Alignment **Dec. 2023 – May 2024**
Supervised by Prof. Simon S. Du *CSE, University of Washington*

- First-authored work submitted to **NeurIPS 2024**, under review.

Representation Theory of Transformer for Reinforcement Learning **Nov. 2023 – Jan. 2024**
Supervised by Prof. Huazhe Xu *IIIS, Tsinghua University*

- We challenge the common wisdom and prove theoretically and empirically that Transformers are not suitable for Partially Observable RL, while advocating Linear RNN as a promising alternative. Second-authored work accepted by **ICML 2024**.
- We establish that regular languages, which Transformers struggle to model, are reducible to POMDPs. This poses a significant challenge for Transformers in learning POMDP-specific inductive biases, due to their lack of inherent recurrence found in other models like RNNs, with empirical results highlighting the sub-optimal performance of the Transformer and considerable strength of LRU.

Tuning Language Model for Offline Reinforcement Learning **June 2023 – Sept. 2023**
Supervised by Prof. Huazhe Xu *IIIS, Tsinghua University*

- We leverage the power of pre-trained Language Models for low-level motion control in offline reinforcement learning. First-authored work accepted by **ICLR 2024**.
- We demonstrate the superiority of LaMo over DT-based and value-based offline RL algorithms. Specifically, we find that LaMo could successfully handle the challenging low-data regime while DT could not. This highlights the great potential of our cross-domain pre-training for sequential modeling.

Visual Representation for Reinforcement Learning **Mar. 2023 – May 2023**
Supervised by Prof. Huazhe Xu *IIIS, Tsinghua University*

- We propose H-InDex, a hand-informed visual representation for dexterous manipulation with reinforcement learning. Second-authored work accepted by **NeurIPS 2023.**
- We show the effectiveness of our framework on 12 challenging visual dexterous manipulation tasks, comparing with recent strong foundation models such as VC-1. Our study has offered valuable insights into the application of pre-trained models for dexterous manipulation, by exploring the direct application of a 3D human hand pose estimation model

Awards & Honors

Jiang Nanxiang Scholarship **Nov. 2023**
Tsinghua University *top scholarship; 1 student per major*

China National Endeavor Scholarship **Oct. 2022**
Beijing Education Bureau *1 student per major*

Xue Tang Scholarship of Tsinghua University **Oct. 2021 – Present**
Tsinghua University

First Prize in College Student Mathematics Competition (Beijing) **Oct. 2022**
Chinese Mathematical Society

First Prize in National High School's Mathematics Competition of China (Jiangsu) **Oct. 2020**
Chinese Mathematical Society *top 20*

Service

Conference paper reviewer
NeurIPS 2024 *Online*

Workshop Program Committee **Oct. 2023**
FMDM 2023 at NeurIPS *Online*

Drop-in Tutoring for STEM Courses **Oct. 2022 – Present**
Tsinghua University *Beijing, China*

I have 157 hours of officially recorded volunteering work.

Selected Courses

Mathematics and Theory: Calculus (**A**$^+$), Linear Algebra (**A**), Abstract Algebra (**A**), Introduction to Complex Analysis (**A**), Probability and Statistics (**A**), Basic Topology (**93**), Introduction to Optimization (**A**), Theory of Computation (**A**), Physics of Information (**A**);
Programming and AI: Introduction to Programming in C/C++ (**A**$^+$), Intelligent Unmanned System (**A**$^+$), Type-safe Modern System Practice (**A**), Machine Learning (**A**), Artificial Intelligence: Principles and Techniques (**A**), Natural Language Processing (**A**).

Technical Skills

Programming Skills: Python, C/C++, LaTeX, Bash, Scala, Matlab.
Language Skills: Chinese Mandarin (native), English (CET-6, TOEFL 104 [R30/L26/S23/W25]).
